

IMPACT REPORT 2023

At IT4Causes, now in our *tenth year* of operations, we're strengthening our community by *helping many purpose-driven nonprofits with their data and technology needs*. Our partner agencies work in areas ranging from early childhood to senior services, environment and wildlife to disability support, community development to arts and culture, and more.

Nonprofit organizations must be able to efficiently and securely manage the information that's critical to their mission. Too often, small- and mid-sized nonprofit organizations have outdated technology that limits their capacity to serve community needs. *IT4Causes provides low-cost solutions* that ensure the *efficient flow of information* and allow staff to harness and use data to *improve operations* and have a greater impact on the lives of their clients for years to come.

Watershed Institute
Wednesday Music Club

Technology Services

We provided comprehensive review of current technology and how it enables or hampers core business processes at 10 agencies in 2023. We used the info collected and our extensive knowledge of nonprofit IT to recommend projects to make 32 agencies more effective through improvements in:

- Networks and connectivity
- Low-cost and free hardware and software
- Email/Office productivity
- Cybersecurity
- Cloud services
- Data management
- Process automation
- Outcomes tracking
- Information security
- Telephones
- Fundraising
- Collaboration
- Websites & social media
- Case Management

Skilled IT Volunteers

Over 100 IT professionals and other volunteers engaged with IT4Causes to help implement hundreds of projects that improved day to-day operations at our partner agencies, and helped them serve over 20,000 clients across the region more efficiently, with better support and services, for years to come.

Intern Program

In 2023 we partnered with local colleges & universities to give 17 students, mostly from disadvantaged backgrounds, with paid opportunities to learn real-world skills & network with our volunteers & staff while building their skills & resumes and also making an impact in the community.

Business Model

To ensure sustainability of our services, our client nonprofits pay nominal hourly rates for our staff while providing skilled volunteers and interns at no cost. This typically means nonprofits are getting 2-5 hours of service for every paid hour.

Impact of Donations

Your financial contributions reduce what agencies must pay for our services & allow us to serve more clients. Our extensive use of interns & volunteers means that every dollar you give has about \$5 worth of impact at our nonprofit partners.
